

ABSTRAK

Setiawan Mendrofa, 2025. Analisis Kesulitan Belajar Siswa Pada Materi Memahami Jenis Konstruksi Jembatan. Skripsi, Pembimbing Aprianus Telaumbanua, S.Pd., M.Pd.

Penelitian ini dilatarbelakangi oleh kesulitan belajar pada proses belajar jenis konstruksi jembatan siswa pasif untuk bertanya, kurang semangat, acuh tak acuh, siswa tidak memperhatikan saat guru menjelaskan, siswa merasakan sulit dalam mengerjakan soal-soal materi jenis konstruksi jembatan. Penegakan disiplin juga berperan dalam hal ini. Jenis penelitian yang digunakan adalah kualitatif Populasi penelitian berjumlah 12 orang siswa dengan sampel penelitian adalah seluruh kelas XII-BKP sebanyak 12 siswa. Teknik pengambilan data pada penelitian ini dari angket penelitian diperoleh minat dan motivasi. Dari hasil penelitian rata-rata nilai siswa mencapai kkm dengan rata-rata 7096. Hasil analisis data disimpulkan bahwa “Terdapat Pengaruh Penggunaan metode kualitatif Terhadap Hasil Belajar Siswa Pada Materi memahami jenis konstruksi jembatan”.

Kata kunci : Analisis Kesulitan Belajar Siswa Pada Materi Memahami Jenis Konstruksi Jembatan

ABSTRACT

Setiaman Mendrofa, 2025. *Analysis of Students' Learning Difficulties in Understanding*

Types of Bridge Construction. Thesis, Supervisor Aprianus Telaumbanua, S.Pd., M.Pd.

This research was motivated by learning difficulties in the process of studying bridge construction types, students were passive in asking questions, lacked enthusiasm, were indifferent, students did not pay attention when the teacher explained, students found it difficult to work on bridge construction type material questions, enforcement of discipline also played a role in this. The type of research used was qualitative. The research population was 12 students with the research sample being the entire class XII-BKP totaling 12 students. The data collection technique in this research was from a research questionnaire to obtain interest and motivation. From the research results, the average student score reached kkm with an average of 70.70. The results of the data analysis concluded that "There is an influence of the use of qualitative methods on student learning outcomes in the material of understanding types of bridge construction."
