Laoli Julkatnia, Hubungan Kondisi Sosial Ekonomi Orangtua Terhadap Motivasi Lulusan SMK Melanjutkan Pendidikan Tinggi Di Desa Nazalou Alo'oa, Kecamatan Gunungsitoli. Pembimbing Skripsi Eka Septianti Laoli, S.Pd., M.Pd. E

Penelitian ini adalah penelitian kuantitatif yang bertujuan untuk menguji secara empiris mengenai Hubungan Antara Kondisi Sosial Ekonomi Orangtua Terhadap Motivasi Lulusan SMK Melanjutkan Pendidikan Tinggi Di Desa Nazalou Alo'oa, Kec, Gunungsitoli. Berjalan dengan landasan teori, maka diajukan hipotesa yang berbunyi ada hubungan positif antara kondisi sosial ekonomi orangtua terhadap Motivasi Pendidikan Melanjut Ke pendidikan Tinggi pada siswa khususnya di desa Nazalou Alo'oa. Dimana semakin tinggi dorongan kondisi ekonomi sosial orangtua maka semakin tinggi pula motivasi siswa ingin melanjutkan ke pendidikan tinggi. Sebaliknya semakin rendah kondisi ekonomi sosial orangtua maka semakin rendah pula motivasi siswa dalam melanjutkan pendidikan tinggi.

Penelitian ini melibatkan 32 orangtua, 32 siswa yang domisili di desa Nazalou Alo'oa sebagai subjek penelitian. Pengambilan sampel dilakukan dengan teknik *random sampling*. Penelitian ini menggunakan instrumen skala rikert untuk skala kondisi sosial ekonomi orangtua terhadap motivasi lulusan SMK melanjutkan pendidikan tinggi. Berdasarkan analisis data, diperoleh hasil terdapat hubungan yang kuat antara kondisi sosial ekonomi orangtua terhadap motivasi siswa melanjutkan pendidikan tinggi. Hasil ini dibuktikan dengan uji Parsial (Uji T) dengan hasil Nilai T_{hitung} yang diperoleh sebesar 3.274 dengan kriteria pengujian, jika $T_{hitung} < T_{tabel}$, maka H_0 diterima H_1 ditolak, dan jika $T_{hitung} > T_{tabel}$ maka H_0 ditolak H_1 diterima. Maka disimpulkan $T_{hitung} (3.274) > T_{tabel} (2.042)$ dengan hasil H_0 ditolak H_1 diterima. Di dukung oleh signifikan hasil Uji Parsial T sebesar 0,003 dengan kriteria apabila $sig > \alpha (0,05)$, maka H_0 diterima H_1 ditolak sebaliknya $sig < \alpha (0,05)$, maka H_0 ditolak H_1 diterima. Sehingga, nilai $sig 0,003 < 0,05$ berstatus H_0 ditolak dan H_1 diterima. Menandakan Kondisi sosial ekonomi orangtua memiliki hubungan signifikan terhadap Motivasi Pendidikan siswa melanjutkan pendidikan Tinggi.

Kata Kunci: Kondisi Sosial Ekonomi, Orangtua, Motivasi Pendidikan Tinggi, Siswa SMK Desa Nazalou Alo'oa.

ABSTRACT

Laoli Julkatnia, The Relationship Between Parents' Socioeconomic Conditions and the Motivation of Vocational High School Graduates to Continue Their Higher Education in Nazalou Alo'oa Village, Gunungsitoli District. Thesis Supervisor: Eka Septianti Laoli, S.Pd., M.Pd. E

This quantitative study aims to empirically examine the relationship between parental socioeconomic conditions and the motivation of vocational high school graduates to pursue higher education in Nazalou Alo'oa Village, Gunungsitoli District. Based on this theoretical foundation, the hypothesis is proposed that there is a positive relationship between parental socioeconomic conditions and motivation to pursue higher education, especially in Nazalou Alo'oa Village. The higher the parental socioeconomic conditions, the higher the student's motivation to pursue higher education. Conversely, the lower the parental socioeconomic conditions, the lower the student's motivation to pursue higher education.

This study involved 32 parents and 32 students residing in Nazalou Alo'oa Village as research subjects. Random sampling was used. This study used a Rikert scale to measure parental socioeconomic conditions and the motivation of vocational high school graduates to pursue higher education. Based on data analysis, a strong relationship between parental socioeconomic conditions and student motivation to pursue higher education was found. This result is proven by the Partial test (T Test) with the calculated T value obtained of 27.502 with the testing criteria, if $T_{hitung} < T_{table}$, then H_0 is accepted H_1 is rejected, and if $T_{hitung} > T_{table}$ then H_0 is rejected H_1 is accepted. It is concluded that $T_{hitung} (3.274) > T_{table} (2.042)$ with the result that H_0 is rejected H_1 is accepted. Supported by the significant results of the Partial T Test of 0.003 with the criteria if $sig > \alpha (0.05)$, then H_0 is accepted H_1 is rejected otherwise $sig < \alpha (0.05)$, then H_0 is rejected H_1 is accepted. Thus, the sig value of $0.003 < 0.05$ status H_0 is rejected and H_1 is accepted. Indicates that the socio-economic conditions of parents have a significant relationship with the Educational Motivation of students to continue their Higher Education.

Keywords: Socio-Economic Conditions, Parents, Higher Education Motivation, Vocational High School Students of Nazalou Alo'oa Village.
